Staz Cybersecurity

Staz Cybersecurity

About Us

We are an emerging cybersecurity company having experienced cybersecurity analysts. We provide customized software and hardware for cybersecurity purposes specifically designed for the business or company we are defending.
We have inspected your business vastly and we think we will be the right fit for your business.

Features / Services

Anti Hacking

We will provide your business websites and software with extensive anti-hacking protection so you will not have to worry about takedowns, DDOS attacks, etc.

Data Breach Protection

We will provide your business with advanced protection against data breaches using our convoluted anti-breach software.

Web Protection

All of your company's searches will be relegated through our web protection framework so you will be protected against any nefarious websites.

Advanced Antivirus

Our customized antivirus specificially designed for your business will be installed on all of your company's machines to protect your business against all sorts of viruses.

Identity Theft Protection

We will provide customized hardware that will be plugged in your business machines to avoid identity theft.
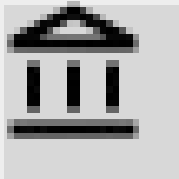

Password Management

We will provide a secure password management system so your employees will not have to remember complicated passwords.

Procedure

1 - Onsite Analysis

We will send our experienced cybersecurity analysts to visit your business site to gather all sorts of information which will be used for our protection plan.

2 - Preparation

During this time, we will prepare customized hardware and software for your business. Meanwhile, we will provide basic cybersecurity protection.
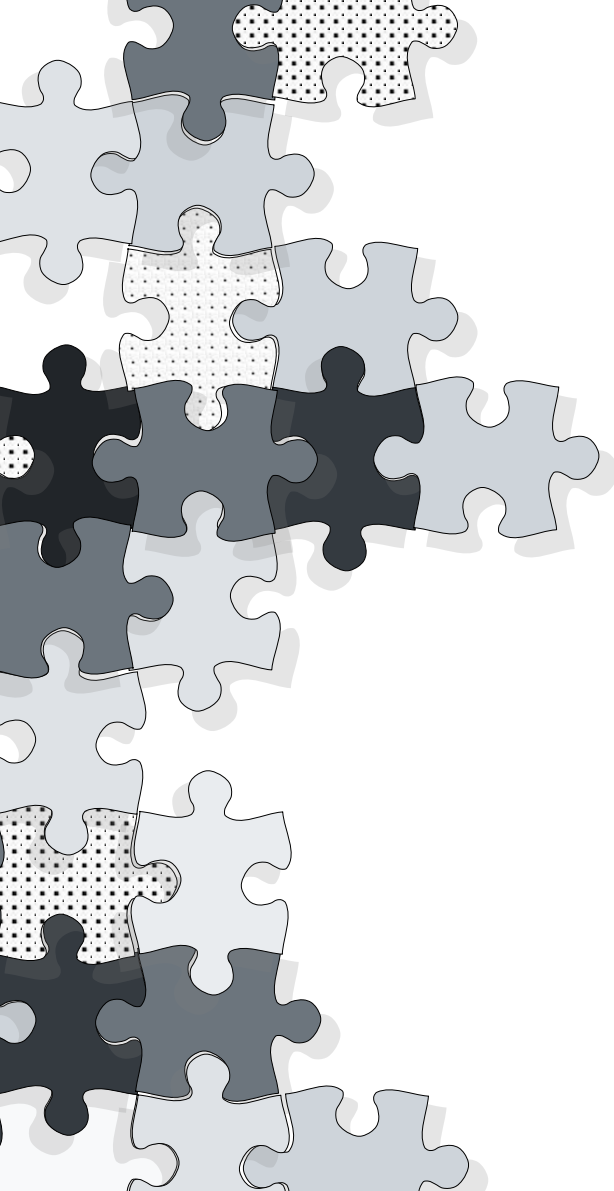

3 - Installation

After preparation, we will install the software and hardware on your business machines. After installation, your business's protection will be our responsibility and you will not have to worry about cyber attacks ever again!

Remarks

We believe that wherever you live, whatever you love, wherever you're going, and whatever you do, you have the right to live freely and safely online.

As you may already know that cyber attacks are on the rise and leaving your business open to such attacks can affect its reputation in a negative way. New form and shapes of attack rise on a daily basis and we are willing to fight against them for your business. Hopefully, you will let us do that!

Reach out to us at our headquarters in Lahore or email us at staz@cyber.com.

> " It takes decades for a company to build its reputation and few minutes of cyber-incident to ruin it.
